PRICES ARE NOW A PATIENT'S RIGHT

It's now the law for hospitals to post all upfront prices. You have the right to know prices, **Save Your Money**, and prevent overcharging. Here's How:

- Go to hospital websites, **search “price transparency”** and find the upfront price.

- If the hospital isn't posting prices, **call the billing department** and remind them it's the law.

- **Ask for the total price**, including anesthesia, lab, radiology, and facilities fees.

- **Never accept “estimates”**, demand upfront prices.

- If you are “overcharged”, **demand an itemized bill**, compare it to the posted website prices and **write your dispute letter**.
